

Florida's Statewide Benefits from Aviation

Florida realizes significant annual economic benefits from aviation. The Florida Department of Transportation completed a comprehensive economic impact analysis to measure these benefits. Benefits measured in the FDOT study considered direct and indirect economic impacts and induced impacts that result from the multiplier effect. A summary of Florida's annual economic benefits from aviation follows:

Impact Category	Total Employment	Total Payroll	Total Output
Airports	158,861	\$7,752,561,600	\$28,793,238,700
Visitors Arriving by Air	753,853	\$19,315,252,400	\$59,178,047,200
Construction at Airports	25,321	\$1,041,077,200	\$2,858,791,800
Air Cargo	69,256	\$3,054,598,800	\$6,596,812,200
Aviation Education	6,977	\$201,195,400	\$573,188,000
Military Aviation	116,860	\$5,855,976,400	\$10,797,219,600
Aviation Businesses	35,986	\$1,255,264,800	\$5,321,292,400
Federal Aviation Administration	4,545	\$318,215,600	\$617,783,700
Total Annual Economic Benefits	1,171,159	\$38,794,142,200	\$114,736,373,600

Total annual economic output shown above represents more than 15 percent of Florida's gross state product (GSP). Many employers in Florida also rely on aviation to support their daily activities. Use of aviation helps to improve business efficiency. The FDOT study shows that, annually, by using all facets of air transportation, the efficiency of Florida businesses is increased by an estimated \$94.5 billion. This increased business efficiency is in addition to the total annual economic benefits noted above.

Palm Beach International Airport

Palm Beach International Airport is located on Florida's East Coast, adjacent to Interstate 95. The airport has three active runways; the longest runway is 10,008 feet. Facilities at the airport are capable of supporting a full range of commercial and general aviation aircraft.

Palm Beach International Airport serves a mix of personal, leisure, and business-related travel. Nearly 3.5 million enplaning commercial passengers flow through the airport each year; more than 60 percent of these enplanements are visitors whose spending helps to contribute to the airport's economic impact. Easy access from Interstate 95 and nationally recognized tourist destinations help to fuel demand for Palm Beach International and its facilities.

The airport has over 60 on-site aviation-related tenants. Many of these are dedicated to supporting the airlines and commercial passenger travel; the remainder support the airport's general aviation customers. The annual economic impact of Palm Beach International Airport is associated with direct impacts that come from tenants/businesses located at the airport and construction projects that are undertaken by the airport or by on-site businesses. Indirect impacts are associated with spending from visitors who arrive in the area via commercial and general aviation aircraft. The airport's total annual economic impact follows:
