About Us

Since its inception in 1949, the Mental Health Association of Palm Beach County (MHA) has been dedicated to improving the lives of people who are touched by mental illness and co-occurring disorders. MHA is working with our community partners to reduce the stigma of mental illness and to improve understanding about issues related to mental health and well-being. Through advocacy, education, research, and outreach, MHA seeks to improve access to mental health services for all who need them.

Mission Statement

The Mental Health Association of Palm Beach County, Inc., a non-profit organization, is dedicated to leadership in promoting mental wellness for children, adults, and families, and providing advocacy for those with mental disorders through education and cooperative planning.

Vision Statement

Through advocacy, education, and services, Palm Beach County residents will have access to information and programs that promote mental wellness and provide help to those with mental disorders.

The Mental Health Association is a Nonprofits First Certified Agency.
Dear Friends of the Mental Health Association,

On behalf of the Board of Directors, staff and volunteers of the Mental Health Association of Palm Beach County, I would like to present our 2010 Annual Report. In these very challenging times the need for our services has never been greater. We are steadfast in our commitment to improve the lives of people touched by mental illness through advocacy, education, research and outreach.

Throughout 2010, we have maintained and reinforced our relationships with community partners, who share our vision of promoting optimal mental health and wellness, and augment outreach programming. We also launched several new initiatives including our new Mental Health Learning and Resource Center, which will in 2011 provide many opportunities for education, outreach and advocacy.

We were able to provide assistance to thousands of Palm Beach County residents in 2010. Thanks to the generous financial support of our members, individual donations, grants, and government support, we were able to provide resources, information, and referrals to hundreds of additional families and individuals in Palm Beach County needing help. Also, our programs to educate and advocate have helped improve access to mental health and wellness throughout the year. We will continue in 2011 to expand our services and programs.

Please enjoy reading about our programs in the coming pages of the annual report. For more information on programs as well as an extensive resource center with the latest information on mental health and wellness, please visit our new web site at www.mhapbc.org.

Sincerely,

Pamela Gionfriddo, CEO

Annual Report 2010
Peer Place: A Community of Friends Supporting Wellness & Recovery

We have moved! Our new location is 2100 45th St., Suite B12 in West Palm Beach, FL, 33407 (corner of 45th and Congress).

Our mission is to encourage individuals to take charge of their own recovery from mental illness and/or substance abuse by offering them the opportunity to achieve their personal potential and continued growth through after care and ongoing support, supported employment, recreation, and education.

Peer Place is unlike any other program in Palm Beach County. The mission of the Center is to empower, promote, and advocate for the residents of Palm Beach County by providing information, referral services and supports. This peer mentoring program employs nationally recognized peer support strategies for helping people with chronic mental illness, regardless of income and status, achieve the best outcomes possible in their lives. Prevention, recovery and resiliency are at the core of the mission of Peer Place Drop-In Center. Established in 1992, Peer Place Drop-in center provides a safe and comfortable place for consumers of mental health services to learn essential wellness and recovery skills. As a result of services received at Peer Place: more consumers of mental health services:

- are stabilized and fewer decompensate into illness.
- have fewer costly hospitalizations and high end intensive out-patient treatment.
- become part of a supportive community of peers.
- are better prepared for supported and independent living in the community.
- develop social and work skills.
- actively seek informal advice from peers and advice from professionals.
- know about and use community resources.

Peer Place serves more than 600 people with mental illness each year, and many of them return frequently for services and support.
Children’s Prevention Programs

Listen to Children

Opening the Hearts of Children Through Active Listening

Children need a caring adult to listen to them when they need someone to talk to. Listen to Children uses trained volunteers in the elementary and middle school setting to provide confidential one-on-one listening sessions with children who have been identified by their teachers as needing extra help due to family problems, isolation, low self-esteem, or other behavioral clues. The volunteer visits the child once a week to listen and problem solve with the child.

Here is what one former Listen to Children child said about our Volunteer Mentor of the Year!

"I owe everything that I have to the volunteer Listener that I spent my 6th and 7th grade year, Mrs. Val Santiago Stanley. She was always helping me (even if I knew it or not). I will always consider her a second mom, She was a person I could go to for advice, a person I could tell anything without the fear of breach of confidentiality, Val and I met once a week for my first two years of middle school. I have formed a relationship with her that I have with no other person.

...I will support this program in any way."

This wonderful program is growing and helps over 300 children in 45 schools using more than 75 volunteer mentors. Almost all of the volunteers (93%) said Listen to Children made a difference in the children’s lives. Under the direction of Dr. Elizabeth White, mentors receive excellent training and support.
MPower for Teens

MPower for Teens, launched in August 2009, is designed to educate teenagers on mental health issues relevant to them, to initiate interest in potential careers in the mental health profession, to de-stigmatize mental health care, and to support the community through service projects promoting mental wellness.

This new program is being pilot-tested in one high school in Palm Beach County during the 2009-2010 school year with a plan to expand it to more schools in the future. Young people learn, through a series of speakers about a variety of disorders including eating disorders, stress and anxiety, major mental illnesses, and much more.

The MPower Club at Park Vista High School celebrated the exciting debut of their two Public Service Announcements (PSAs). The students filmed these PSAs on eating disorders and they are making the final edits now. The PSAs will be released next month on MHA’s You-tube Channel— stay tuned to our web site for more www.mhapbc.org.

Guest speaker Johanna Kandel talks about Eating Disorders
Beacon Community Centers  
*Developing Youth Leadership, Adult Enrichments & Family Strengthening*

The Mental Health Association operates three Beacon Community Centers in the Palm Beach County School District: South Grade Elementary, Lake Worth; Washington Elementary, Riviera Beach; and Lantana Elementary, Lantana. Each center’s activities are designed to meet the community’s unique needs to further develop strong neighborhood relationships, opportunities and support systems.

Beacon Program Sunsets

MHA Beacon Centers in Riviera Beach and Lake Worth closed during 2010. Since 2001, our Beacon Centers provided continuous support to our students and families. We worked to develop strong neighborhood relationships, opportunities, and support systems. Activities included teen programs, community awareness initiatives, evening education programs for adults and children, and after-school and summer care. Thank you to the Beacon Directors Yulondo Rozier-Bozeman, John Gilmore, and Calvin Phillips and your staff for your dedication to the families in our community.

Yulondo Rozier-Bozeman  
John Gilmore  
Calvin Phillips
Be Merge Integration of Behavioral and Primary Health Initiative

With support from a planning grant from the Palm Healthcare Foundation, the MHA led a year-long project aimed at changing the way that primary care and mental health services are integrated in our medical community. The Be-Merge Primary Care and Integration Project has studied ways of educating doctors, nurses, physician’s assistants, and medical students to recognize mental health issues in the primary care setting. The project also created a toolkit of screening instruments and other tools to improve care.

MHA’s Be Merge project conducted pilot trainings at Nova University (above), Foundcare/CAP, and the Department of Health.

MHA is actively recruiting providers into the network and creating a database of current information about behavioral health care providers. The referral network will provide comprehensive information to consumers, doctors, nurses and other primary care staff about where to get needed behavioral health care in Palm Beach County. Our goal is to work toward making our resource directory as complete as possible. Once this directory is completed, the information will be made available to those who call and on our web site.

Transition from Jail To Community Initiative (TJC)

The Transition from Jail to Community Project is an exciting new 4-year initiative to help county prison inmates successfully transition back into the community. MHA is working along with 28 other partner agencies on this Robert Wood Johnson Foundation funded project. TJC aims to provide mental health care, physical health care, educational and vocational opportunities, parenting classes, and family reunification to 50 recently incarcerated men in the southern areas of Palm Beach County. MHA is on the executive committee and is working to ensure that proposed outcomes are met.
Older Adults Initiative

The Mental Health Association of Palm Beach County is committed to the older adults in our community. MHA collaborated with several community partners including the Area Agency on Aging to assess the mental health needs of older adults and provide the necessary support and resources so they can remain independent and connected to the community. Resources are available to educate the community about the needs of older adults and recommendations for improving the community using the many assets of our older population.

MHA also offers a variety of mentoring and volunteer opportunities to older adults in Palm Beach County. Activities we have accomplished with our partners include:

- Area Agency on Aging provides mentors for our Listen to Children program.
- Information and Referral is a service provided to more than 350 people each year by phone and hundreds using our online resource center www.mhapbc.org.

Approximately ten percent of all information and referral calls come from older adults.
Mental Health Learning and Resource Center

We celebrated the grand opening of the Mental Health Learning and Resource Center. The Rev. Dr. Barbara Nielsen and Carolyn Sullivan were presented with ‘Vision’ awards for their sustaining support of quality training and networking opportunities through the new Learning Center.

Volunteers, Members, and Funders were honored. Thank you to Miriam Davis for 16 years of service and support on the Board of MHA! Ellen Goodman and Hanni Saltzman were recognized for their weekly contribution of baked goods for the people who drop into Peer Place. “You care enough to make the lives of those around you better! A brighter future made possible by people with the spirit to build it one cookie at a time.”
MHA Lunch and Learns and Seminars

A new educational series began in 2010 with interesting seminars on relationship issues.

"10 Things that Keep Relationships Together."

By: Dr. Nancy Vrechek

Date: November 19, 2010

Dr. Nancy Vrechek offered an entertaining and informative Lunch and Learn about relationships. We all left with something new to think about.

"Into Temptation: Infidelity and the Motivations Behind it."

By: Dr. Paul Peluso

Date: October 7, 2010

Dr. Paul Peluso spoke to a packed house about a very interesting topic.

Dr. Paul Peluso (left) speaks with Board Member Dr. Bernie Schulman before the presentation.

Dr. Alina Alonso and Jackie Loban-Marsan got front-row seats for this Lunch and Learn.
MHA Public Policy, Advocacy, and Outreach

The Mental Health Association (MHA) works on behalf of the citizens of Palm Beach County, their friends and family members to advocate for adequate and appropriate funding and increase understanding of mental illness within the community. We know that awareness and treatment works, and we depend upon the support of our legislators and community leaders.

Reviewed and updated annually, our advocacy plan includes involvement on local, state and national levels in order to achieve reasonable and effective policies for children, the elderly and the mentally disabled. We support and partner with local and state advocacy groups to avoid duplication of services and to inform you, the public, about issues that affect your lives.

The Mental Health Association works with community partners to advocate for solutions that will improve the lives of people living with mental illness. MHA works with public policy leaders, service providers, researchers, advocates, consumers, and educators to provide the latest news and information about mental health and wellness. Among the priorities of the Mental Health Association are:

- Increasing understanding about mental health issues among all residents of the county to reduce the stigma of mental illness.
- Countywide mental health system capacity-building that will lead to more coordinated care delivery systems among all providers of mental health services, including independent practitioners, primary care and mental health clinics, hospitals, food and shelter providers, prisons and jails, employers, and educators.
- Partnership program development. MHA works with a variety of community partners to implement targeted strategies to address critical community mental health needs.
- Increasing assistance and support to special populations such as caregivers, veterans and their families, older adults, children and families, populations who are reentering society, specific ethnic/racial groups, and many more.
- Including mental health issues in the Health Care Reform and other policy discussions.
- Improving mental health wellness support and information and referral resources for all in the community.
MHA Provides Information and Referral Services

Information and Referral is a service provided to more than 350 people each year by phone and hundreds using our online resource center.

In Palm Beach County, as is true nationally, more than one in four people (26%) have some form of mental illness, cutting across socio-economic boundaries. One in four adults in Palm Beach County suffers from a diagnosable mental disorder in a given year (more than 261,000 people). Nearly half of those suffer from 2 or more disorders simultaneously.

While serious mental illness strikes a smaller percent of people (6%) we still have close to 60,000 people in Palm Beach County with disorders such as Schizophrenia, Bipolar disorder, and Major Depressive Disorder.

MHA provides information and resources to all community members who call including people with mental illness, their family members, and others who care.

MHA Informs, Inspires, and Impacts on yourPBC

MHAPBC received a grant from the Community Foundation for Palm Beach and Martin Counties, Inc. to provide mental health related content to yourPBC.org, the digital public square for Palm Beach County. The site offers a platform for community information designed to spur action and engage the community.

It’s Okay to Get Help! Campaign Reaches Entire Community

Thanks to the support of Columbia Hospital, Palm Healthcare Foundation, and the Area Agency on Aging, sponsors of our first Mental Health Minutes. The minutes were produced as part of our It’s Okay to Get Help! campaign, which is designed to reduce the stigma of seeking mental health treatment and increase access to care. This groundbreaking collaboration is focused on the prevention of a problem before it reaches a critical stage. If you haven’t seen the Mental Health Minutes airing on Comcast Cable television stations, you can view them on our website at www.mhapbc.org. Produced by the Palm Beach County Film and Television Institute and Youth Empowerment Centers, the minutes provide brief, direct messages stating that It’s Okay to Get Help with a variety of mental health issues.
